

Stepping Stones Learning Center Presents:

Analysis and Treatment of Challenging Eating and Mealtime Behaviors for Children with an Autism Spectrum Disorder

SAVE THE DATE!

SATURDAY, MARCH 31, 2012

Stepping Stones Learning Center, of Rochester New York, is pleased to present a one day comprehensive conference discussing the analysis and treatment of challenging eating and mealtime behavior for children on the autism spectrum. Led by a panel of experts in the field of autism spectrum disorders, conference topics will include the following common challenges: children with very limited food preferences/diets, children who will not remain seated during mealtimes or who engage in other unwanted mealtime behaviors, ingesting non-edible substances, difficulty eating in restaurants, and preference for only a specific bowl, cup, plate or utensil.

With a combined 45 years of experience in the field of developmental disabilities, presenters will offer detailed treatment plans and intervention guidance for the above challenges. Treatment includes behavioral, developmental, and practical strategies for families, caregivers, therapists, and teachers.

Please join us!
